

Pay Transparency Guide

How to use this guide:

We use three different Pay Structures (Structure 115, Structure 110, and Structure 100). The Pay Structures are applied based on the location of the office. If an employee is working remotely, in a role that has been approved for remote work, the Pay Structure is applied based on the location of the employee.

On this page and the next two pages, we've detailed the locations to which each Pay Structure is applied. First, identify the job location (or approved remote work location) to find the appropriate Pay Structure. Then, use the table that starts on Page 4 of this document to find the Job Profile title for the job you're pursuing. The anticipated starting annual compensation ranges ("Pay Ranges") are listed by Job Profile and relevant Job Structure.

NB: Any wages or wage ranges listed directly on a specific job requisition or posting will supersede corresponding wage ranges listed within this document.

Pay Structures by Location:

If the position to which you're applying is in a physical office in one of the following locations, please use **Structure 115**. Note that remote positions (those not in a physical office) do not use Structure 115.
